

Each group, planned, designed and made a shoebox room for our house. First, we looked at magazines and decided on the furniture that we would need. We created a plan by cutting pictures out and creating a design for our room. Next, we thought about the materials that we would need to make the fixtures and fittings for the room and we wrote a list. Finally, we made the pieces for each room, decorated the walls and floors and added some extra 'finishing touches'.

Our finished rooms.
